

Course Description

Grade 2 Technology

Philosophy Statement: God has given man the intellect and ability to design and use complex technology for His purpose and glory. Technology is essential for effective education in an information-based society. A strong foundation in technology based on spiritual, ethical, moral, and intellectual integrity provides for effective integration in all areas. This foundation also enables students to achieve success in learning, communication, and life skills. A student's witness for Christ should be reflected through the use and application of technology.

Course Objective: The students will understand and use basic computer operations. The students will understand the purpose and use of a variety of technology devices. The students will understand the important issues of a technology-based society, including how technology impacts culture and society. The students will exhibit Godly and responsible behavior in the use of technology. The students will use technology to locate, evaluate, and collect information from a variety of sources. The students will use technology to express ideas and exchange information.

Textbooks:

Materials:

- Computer
- Internet
- www.nimblefingers.com

Time Allotment:

15 Minutes per child, once per week.

Course Content:

- Basic computer operations
- Variety of technology devices
- Responsible behavior with use of technology
- Research
- Problem solving
- Communication

Areas to be evaluated:

- Center work

Additional activities:

- E-mail Pals
