

Course Description

Grade 3 TAG

Philosophy Statement: Each student is uniquely created by God and has been given different abilities. Students who demonstrate or have the potential to demonstrate superior performance in academics, intellect, creativity, visual and performing arts, and leadership require additional opportunities and materials to meet their needs. Although all students gifted in these areas need special services, DMCS is currently committed to serving the needs of students with general intellectual and specific academic aptitude. These needs will be met through differentiated instruction and/or various support services.

Course Objective: This course is a systematized enrichment and diagnostic thinking skills program that serves the dual purpose of helping in the identification of academically talented students and teaching students higher level thinking skills.

Textbooks: None

Materials:

- Primary Education Thinking Skills by Jody Nichols, Sally Thomson, Margaret Wolfe, and Dodie Merritt.
- Overhead projector
- Overhead Transparencies
